

## Did You Know?

### Agrisept-L®

- Has a low pH level, allowing it to **leave good flora in the system untouched**, while destroying the bad.
- Is stronger than grapefruit seed extract.
- Is effective against microorganisms and parasites found in contaminated water that cause diarrhea and dysentery in humans and animals.
- Contains approximately 710 drops per bottle.
- Can preserve meats, fruits and vegetables by killing molds, fungi and more while cleaning insecticides and herbicides found on our products.
- Can be used externally for acne, cold sores, head lice, athlete's foot, nail fungi, and warts.
- Can be used to purify water, and is a must for water storage. It remains effective longer than chlorine.

Note: This product is rarely used undiluted.

Information provided in this pamphlet is for educational purposes only. This product is not intended to diagnose, treat, cure, or prevent any disease.

- **Loaded with healthy bioflavonoids.**
- **Fights infection.**
- **Kills Candida, Strep, Staph, E. Coli, Salmonella and Parasites.**
- **Fights cold sores, warts, and toe and nail fungus.**

## Other Uses for Agrisept-L®

### Culinary Water Purification:

- Water Storage: Add 2 drops per gallon to prevent algae growth and kill microorganisms in the water. Remains more effective and lasts longer than chlorine because it doesn't dissipate.
- Drinking Water: Stir 10 drops into a gallon of clear water and let rest a few minutes.
- 72-Hour Kit: Use 4-5 drops per quart in water of questionable quality. Use as an antiseptic for cleaning wounds.

### Cleaning:

- Disinfect counters with a solution of 1 quart water, 2-3 oz. Oxy-Up™, and 8-10 drops Agrisept-L®.

### Fruits & Vegetables:

- Mix 10 drops of Agrisept-L® per gallon of rinse water and soak your fruits and vegetables for 15 minutes.

## Success Story:

In August my husband and I attended a wedding reception at a local country club. About two days after the wedding I began to get phone calls asking if either of us was sick. It turned out that over 100 people who attended the reception had become ill, apparently from something in the water. The lady who sat right next to me was in the hospital!

We found out later that those at our table who used Agrisept-L® (there were many EYI associates at the wedding) did not become ill at all. Those who did get sick cut their symptoms in half once they began taking Agrisept-L®!

Wherever we are, we always put Agrisept-L® in our water. I would not leave home without it. I think it is the best product and I have helped so many people with it!

--D.D., Elyria, Ohio

## Bioflavonoids are vital for your health.

- Bioflavonoids are powerful antioxidants that help your body defend against viruses, carcinogens and poisonous and allergic substances.
- Bioflavonoids assist Vitamin C by keeping your collagen healthy.
- Bioflavonoids are excellent antibacterial agents.
- Bioflavonoids increase strength of capillaries and regulate their permeability.
- Bioflavonoids keep Vitamin C and adrenaline from being oxidized by copper-containing enzymes, while scavenging free radicals in your system.

***Citrus extract is helpful in soothing colds, sore or irritated throats and other respiratory challenges.***

## Testimonials:

"I had a case of athlete's foot that I just couldn't get rid of. Finally I put 3-4 drops of Agrisept-L® directly on my foot and rubbed in on the infected area. Then I squirted a small amount of C-Essence® (shark liver oil) on my foot. I did this for 3 or 4 days and it healed my athlete's foot. This is great stuff!"

--O.S., Orem, Utah

"When I feel that 'scratchy' feeling coming on, I gargle with eight to ten drops of Agrisept-L® in about four to six ounces of water. It works every time. I even have my four and six-year-old boys gargling with Agrisept-L®--the next generation of EYI distributors is being trained!"

--I.Z., Mississauga, Ontario, Canada

"I've got a success story to tell about Agrisept-L®. I had a bad case of vaginal yeast infection before my baby was born and my doctor said my baby was guaranteed to have thrush. Two weeks before the baby was born, I started drinking a gallon a day of water containing 20-30 drops of Agrisept-L®. It not only cleared up my infection, but the baby did not have thrush!"

--M.L., Spanish Fork, Utah

"I wash my vegetables with Agrisept-L® and they come out squeaky clean!"

--O.V., Mapleton, Utah
