

Using Seychelle Filters

Everyday Use

Just fill from the kitchen tap, and drink great-tasting, fresh water without the cost and inconvenience of bottled water.

Camping

Assure the quality of the water you drink when outdoors and waterborne illnesses are a threat to your health.

Exercise

When the highest quality of water is essential, insist on the Seychelle system.

Travel

Seychelle's portable water filtration system provides quality water from the most questionable water sources abroad.

Emergencies

Survival in a bottle! When safe drinking water is not available, depend on your Seychelle water filtration system

Filter Capacity

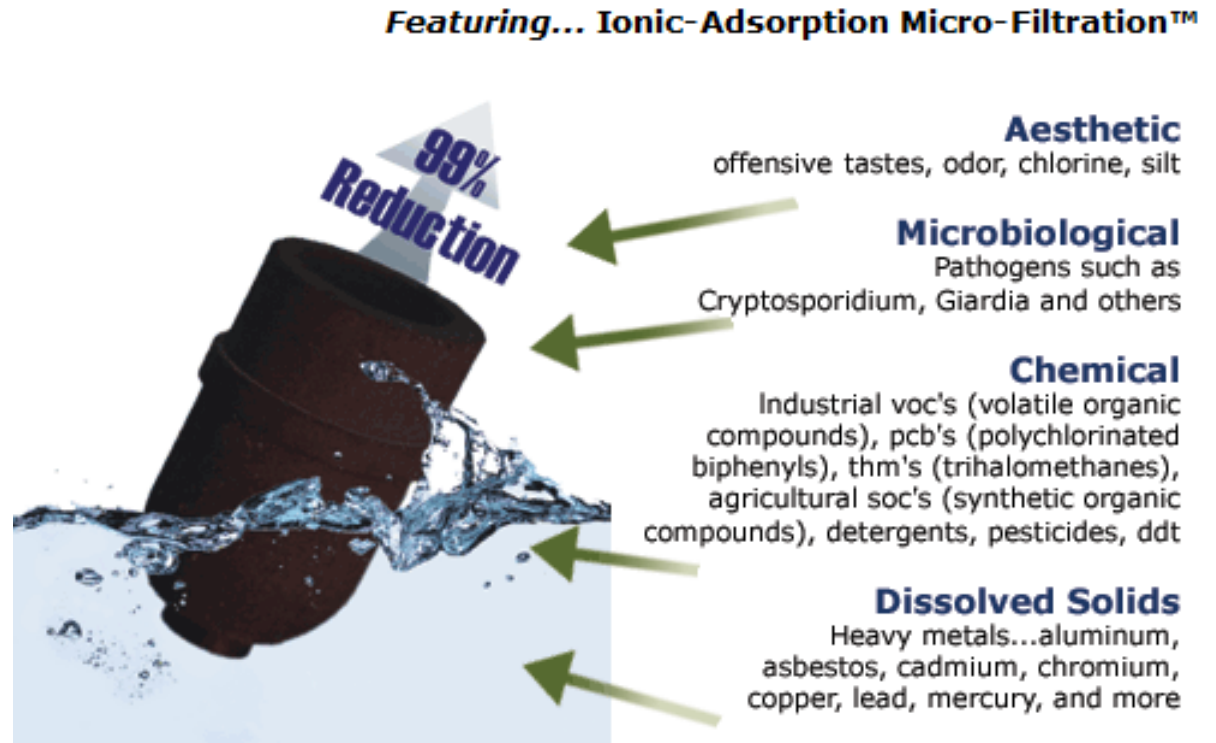

Seychelle filters deliver many, many gallons of great-tasting, fresh water before they need to be changed. The time to change any filter is when the water flow becomes greatly diminished, or it is difficult to squeeze it through the bottle.

Maintenance

Seychelle filters have an indefinite shelf life. For prolonged storage, flush a chlorinated solution (1/2 tsp. per gallon of water) through the system; allow the bottle or pitcher and filter assembly to dry overnight on a paper towel; and store for any length of time.

Why Use Seychelle Water Filters?

Seychelle is the *only* Personal Water Filtration System capable of a **99.8%** reduction in all 4 areas of contamination!

The Technology

Seychelle uses advanced medical technology to create a uniform 2-micron pore size. The high-tech porous plastic micro-filter is impregnated with both the finest granulated activated coconut carbon available and Seychelle's exclusive adsorbing media.

Seychelle's Ionic Adsorption Micron Filters are the most laboratory and field-tested of their kind in the world, using EPA, ANSI and NSF protocols. The standard filter is ideal for any indoor or outdoor use, such as traveling, hiking, biking, camping, fishing or emergency purposes. It can be used with any type of water source: tap water, rainwater, rivers, streams or lakes (anything except salt water).

All Seychelle filters, from the smallest to the largest, are extensively tested by only the highest quality, California state approved laboratories certified to test under the strictest EPA, ANSI & NSF standard methods and protocols.

Comparison of Leading Water Filter Pitchers

% of Contaminants Removed. (N/C=No Claim)

Seychelle Products

(Order from Provident Living Center)

Item #11023

Seychelle 1/2 Gallon Water Filter Pitcher

Replaceable filter purifies up to 150 gallons.

Item #11078

Seychelle Water Filter Sports Bottles

Each bottle purifies up to 100 gallons. Great for camping or 72-hour kit. Several styles available.

Item #11077

Seychelle "Aqua Gear" Deluxe Sports Filter Bottle

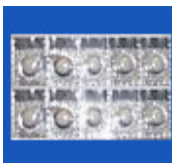

18-ounce bottle purifies up to 100 gallons. Includes screen pre-filter and chlorination tablet holder, plus insulated sleeve and carrying strap.

Item #11076

Seychelle Water Filtration Straw

Includes straw, filter, chlorination tablets, and carrying case. Filters up to 50 gallons. Use like an ordinary drinking straw to provide pure water in an emergency.

Item #11075

Redi Chlor Water Purification Tablets

10 tablets; each tablet treats up to 5 gallons of water.

Protect your family with the best-tested, most versatile, and most cost-effective personal water filtration systems you can buy!
